Care

Instructions

General Glass Product Care Instructions

Use warm water, or a few drops of Methylated Spirits on a damp cloth, then wipe with a dry, lint free cloth.

Do not use Acid or Alkaline cleaners, or commercial cleaners that contain Ammonia or vinegar. To avoid 'edge creep' on mirrors, please follow the above instructions.

The best way to help keep your shower screen looking like new is to follow these instructions. The key is to do this after **EVERY** use.

Wipe the shower screen, walls, and even the floor with a squeegee. Then, wipe the shower screen down with microfibre cloth. Keep a dish washing style sink brush handy for any areas that are awkward, or areas where shower scum is starting to build up. This will only take a minute. If you do this after every use, you will find that you will not need to allocate any specific time to clean the shower screen.

Shower Screens

Enduro Shield Coating

If Enduro Shield Coating has been applied to the Shower Screen, please refer to your Enduro Shield Care Package. Should you not have one, please contact us.

Thanking you, and your builder for choosing Ikon Glass.
